RESEARCH AND ENGINEERING EXPERIENCE

KAIST, School of Computing — Feb 2025–Present
Graduate Research — Daejeon, South Korea
Study LLM knowledge, internal representations, and behavioral reliability through controlled training experiments, activation interventions, linear readouts, subspace analysis, and model evaluation.

NSUSLAB Jan 2024–Sep 2024
AI Engineer Seoul, South Korea
Developed LLM-based translation automation tools and customer-inquiry chatbots.

VCLAB, KAIST Feb 2024–Jun 2024
Undergraduate Researcher Daejeon, South Korea
Researched blind hyperspectral imaging; undergraduate thesis on Blind Spectral Unmixing based on Graph Transformers.

DSAIL, KAIST Mar 2023–Sep 2023
Undergraduate Researcher Daejeon, South Korea
Researched higher-order Conditional Graph Information Bottleneck theory to identify important subgraphs using interacting-graph and contextual information.

DSLAB, IBS Jan 2023–Jun 2023
Undergraduate Researcher Daejeon, South Korea
Researched multimodal fusion and joint training for simultaneous PET–MRI analysis in Alzheimer's disease research.

LEADERSHIP AND SERVICE

OTDA Jan 2022–Dec 2022
Founder Daejeon, South Korea
Founded a designer fashion sharing platform for men and led full-stack development using Flutter, Django, and MySQL.

USFK 8th Army Dec 2020–Jun 2022
